Blade Re-Sharpening Service

39771 Hwy 34 E • Woonsocket, SD 57385 • 1-800-279-7985

## Flesher Blade Re-Sharpening Work Order

**A few important notes:**

We do not sharpen stainless steel blades. Please, do *not* send us any stainless steel blades.

We can not sharpen blades smaller than 10 1/2" in diameter.

Write your name on the blade, using permanent marker.

**General procedure:**

Once you have removed your blade from your flesher, write your name on it - this helps us keep track of your blade in receiving. You are responsible for the initial shipping charge to send the fleshing blade to us. Package your blade for shipping using materials sure to withstand a thin metal blade jostling around in a sleeve without cutting its way through during shipment. Be sure to enclose this work order (or a detailed written order) filled out completely and send blade to one of the two below addresses (US Mail or UPS).

**Via US Mail (USPS):**

Van Dyke's Taxidermy Supply  
Attn: Blade Re-Sharpening Service  
PO Box 367  
Woonsocket, SD 57385

**Via UPS:**

Van Dyke's Taxidermy Supply  
Attn: Blade Re-Sharpening Service  
39771 Hwy 34 E  
Woonsocket, SD 57385

Once we receive your fleshing blade, we put it in process for re-sharpening. When your blade is re-sharpened, we will call you to let you know it is ready and to collect payment for service and return shipping at that time. If you pay the service charge when you send us your blade, there will be an additional charge for return shipping back to you. We recommend waiting until we notify you that your blade is re-sharpened so that only one payment needs to be made. Thanks for the opportunity - our re-sharpening service will make your fleshing blade like new again!

**Please fill out completely**
